Belting Systems

Customers are talking about...

**ULTRA-TUFF™** High Performance Belting

"The chemicals were turning our belts 'chalky' and making them brittle. We were very concerned about belts breaking during production. The Ultra-Tuff™ is running great!"

"(Competitor's) Acetal belt needed weekly repairs and showed almost immediate adverse effects of cleaning chemicals. After 3 months the Ultra-Tuff™ has no breakage and shows no adverse wear"

A NEBRASKA COMPANY

ALL ANGUS. ALL THE TIME.

"We installed Ultra-Tuff™ on our boning table over 6 months ago and haven't even had to repair a module. We couldn't be more pleased with this belt"

"We took a hammer to a piece and couldn't break it. It's working so well in our de-panning application we ordered more to replace the rest of the lines."

"ULTRA-TUFF™ BELT IS WORKING GREAT. ITS BEEN RUNNING FOR 6 MONTHS WITH LITTLE TO NO WEAR SHOWING!"

"The worst application for our plant is the 'Bone Cannon' We have tried everything and nothing worked all that well until we put in the Ultra-Tuff™. Problem Solved."
