

ULTRA-TUFF™ BAKERY DE-PAN CONVEYOR

SAFARI
BELTING

Chemical Resistance

Withstands continuous exposure to PAA, other strong acids & bases.

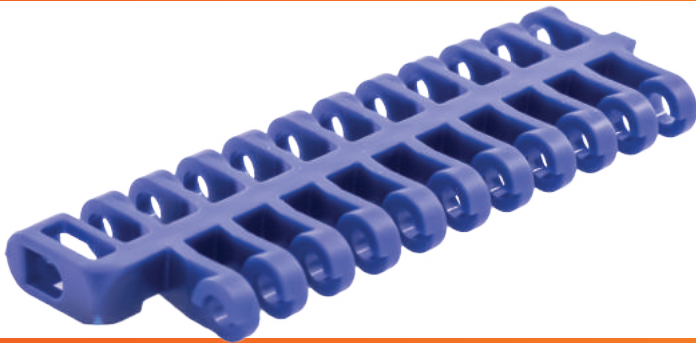

Impact Resistance

Maintains high impact strength for exceptional performance and operational stability.

Abrasion Resistance

Withstands abrasion from both friction and wear which more than doubles belt service life.

ANNUAL COST SAVINGS
\$5,250 PER APPLICATION**

COST SAVINGS DETAILS

PROBLEM

Large, heavy pans drop directly onto Intralox S900 Flush-Grid Belt causing frequent broken modules and weekly down-time for repairs. Full belt replaced twice, annually.

SOLUTION

Customer replaced Intralox S900 (1" pitch) Acetal belt with Safari's Series 125 (1" pitch) ULTRA-TUFF™ belt.

RESULTS

Safari ULTRA-TUFF™ belt installed in July 2017. Three years in service and still running in application. No broken modules. No issues. PROBLEM SOLVED!
