

ULTRA-TUFF™ HAM INCLINE

SAFARI
BELTING

Chemical Resistance

Withstands continuous exposure to PAA, other strong acids & bases.

Impact Resistance

Maintains high impact strength for exceptional performance and operational stability.

Abrasion Resistance

Withstands abrasion from both friction and wear which more than doubles belt service life.

**CUSTOMER DOCUMENTED
ANNUAL COST SAVINGS
\$45,000 PER APPLICATION**

COST SAVINGS DETAILS

PROBLEM

Whole, bone-in hams dropping onto Intralox S800 "Tuff" belt resulting in daily repair of broken modules and full belt replacement every 2 months. This problem application was a high risk for foreign material contamination and down-time.

SOLUTION

Customer replaced Intralox S800 "Tuff" belt with Safari's more robust 2.5" pitch Series 250 ULTRA-TUFF™ with 4" tall, heavy-duty ULTRA-TUFF™ flights.

RESULTS

Safari ULTRA-TUFF™ belt installed in April 2019. No broken modules. No issues. PROBLEM SOLVED!
