

ULTRA-TUFF™ SNACK FOOD WHOLE POTATO

Chemical Resistance

Withstands continuous exposure to PAA, other strong acids & bases.

Impact Resistance

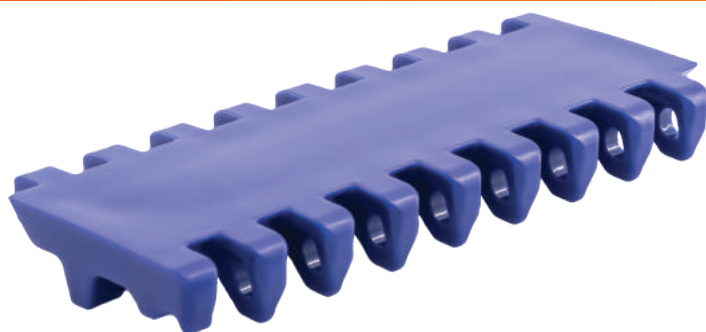

Maintains high impact strength for exceptional performance and operational stability.

Abrasion Resistance

Withstands abrasion from both friction and wear which more than doubles belt service life.

COST SAVINGS DETAILS

PROBLEM

Wet, raw potatoes are being conveyed up an incline, from washer to slicer. Potatoes constantly tumble backwards, causing flights to break on a daily basis and full belt replacement, monthly.

SOLUTION

Customer replaced Intralox S800 (2" pitch) Acetal belt with Acetal flights, with Safari's Series 225 (2" pitch) ULTRA-TUFF™ belt with ULTRA-TUFF™ flights.

RESULTS

Safari ULTRA-TUFF™ belt installed in February 2019. No broken modules. No issues. PROBLEM SOLVED!
